

YELLOW FEVER

GIVE YELLOW FEVER THE KICK!

Yellow fever is a viral disease spread by mosquitoes that can lead to serious illness and even death. It exists in parts of Central and South America and Africa.

Many countries, including Australia, have entry regulations for yellow fever vaccination that must be met before entering.

Don't let the risk of **yellow fever** and other harmful diseases ruin your holiday.

To protect yourself against mosquitoes use repellent and wear long sleeved clothing. Talk to your doctor about yellow fever vaccination before you travel.
